

MultiPortal vs vCloud Director

The Smarter Solution

At MultiPortal, we change the game with a platform engineered exclusively for Proxmox users—empowering you with precision, simplicity, and unparalleled efficiency. Why settle for a platform that dictates your process? VMware vCloud Director burdens businesses with rigid design and high costs, forcing them to navigate unnecessary complexity.

How We Compare

	MultiPortal	VMware Cloud Director™
Simple, Proxmox-Optimised Setup Fast, Linux based deployment with easy Proxmox integration	✓	✗
Flexible Multi-tenancy Support multi-tenancy with simplified setup	✓	✓
Affordable pricing options Community Plan (free) and affordable Enterprise Edition	✓	✗
Integrated Backup & Patching Tools Built-in backup and patching support	✓	✗
User-Friendly Resource Management Simple, low complexity architecture	✓	✗
Community & Enterprise Support Community-driven support, Enterprise support in paid plans	✓	✓
Proxmox-Exclusive Features Purpose-built for Proxmox, reduces overhead	✓	✗
Scalable Deployment for Growing Environments Cost-effective, ideal for CSPs and mid-sized teams	✓	✓
Seamless Multi-Cluster Management Manage multiple environments from a single, intuitive platform.	✓	✓
Built-in Usage VDC Usage Tracking Track per-tenant usage without external tools or add-ons	✓	✗
One-Click Upgrades Simplified upgrades with no service disruptions or complex steps	✓	✗
All-in-One Functionality with Fewer Dependencies Native usage, backup, and patching—no third-party tools needed	✓	✗

Redefining Infrastructure Management

Say goodbye to complexity and hello to effortless control. Unlike VMware vCloud Director, burdened by bloated costs and outdated rigidity, MultiPortal is purpose-built to empower Proxmox users. Streamline your infrastructure, maximise efficiency, and unlock unparalleled simplicity—all without the heavy overhead of traditional solutions.

- **Proxmox Optimised**

Purpose-built for Proxmox, MultiPortal delivers seamless integration and tailored performance.

- **Effortless Management**

Intuitive tools and scalable architecture make infrastructure management simple and reliable

- **Simple Multi-Tenancy Management**

Simplify tenant management with MultiPortal's intuitive tools for onboarding, resource allocation, and monitoring all in one place.

- **Effortless Management**

MultiPortal integrates backups directly into the platform, saving time, cutting complexity, and enhancing security.

- **Cost-Effective by Design**

Say goodbye to unnecessary expenses—MultiPortal focuses on what drives your success and eliminates overhead.

- **Future-Ready**

Built to grow with you, MultiPortal offers agility and innovation that outpaces the competition.

- **Affordable and Transparent Pricing**

MultiPortal delivers premium features at scalable, predictable pricing—no inflated licensing fees, just cost-efficient growth.

Ready to Simplify Your Infrastructure Management?

Say goodbye to complexity and hello to effortless control. Unlike VMware vCloud Director, burdened by bloated costs and outdated rigidity, MultiPortal is purpose-built to empower Proxmox users. Streamline your infrastructure, maximise efficiency, and unlock unparalleled simplicity—all without the heavy overhead of traditional solutions.

Better management starts here.
